

TCEQ/DFW Waste Section  
Waste Sampling and Analysis Plan  
Lane Plating  
5322 Bonnie View Rd, Dallas, TX 75241  
RN100597707

Date Inspection: 11/04/2015

Date Sampling: 11/19/2015

Collection of Representative Samples

1. Collect 4-oz samples from each selected site using simple random sampling at approximately 40-ft intervals.
2. Maintain a written record of action throughout the day.

“Split” samples were not collected by TCEQ sampler due to a bankruptcy filing by Stag Management Incorporated for the site. Stag Management Incorporated Directors are Mr. J.R. Lane and Mr. Joe D. Lane, former operators of Lane Plating.

Blanks and duplicate samples will be collected in accordance to the current version of FOD “QUALITY CONTROL GUIDELINES FOR SAMPLING BY TCEQ FIELD INVESTIGATORS IN THE WASTE PROGRAM.”

Sample Preservation

No chemical preservatives will be used in the samples. All samples will be kept on ice to help achieve and maintain an optimum temperature of 4 degrees Celsius between the time of collection and delivery to Pace Laboratory.

Sample Shipment Chain of Custody

Each sample will be affixed with a label that lists the sampler’s name, sample identification number, date, time of sample collection, and analysis to be performed. Samples will be kept in a secure location during transportation to Pace Laboratory.

The samples will be transported to a Pace satellite office. From there, the samples will be transported to the Pace laboratory by Pace personnel.

Sample Analysis Request

Analysis will be conducted using the following SW 846 Methods:

RCRA 8 metals and Texas Class 1 metals.

Containers:

4-oz glass jars

Equipment

Sample collections were made with a plastic scoop.

### Records

Field notes may be used to record any pertinent details of the sampling event, particularly any deviation from this Sampling and Analysis Plan. Investigators may take photographs during the sampling event. An investigation report for TCEQ will be generated and filed. It is expected that correspondence concerning the results of the investigation will be directed to the TCEQ Litigation Division.
